Open House: CANCELLED . Whether you're looking for a quiet family retreat or the ultimate home for hosting, this architectural gem in Collingwood hits every mark. Tucked away in a peaceful cul-de-sac, close to all amenities including U of C, foothills hospital, all levels of schools, and nose hill park, this 2-storey home offers over 4,700 sq. ft. of space that feels both expansive and incredibly welcoming . The real showstopper is the architectural core of the home: a stunning open-beam staircase framed by towering windows that stretch all the way from the basement to the second floor. This design floods every level with natural light and creates a bright, airy energy the moment you walk in. The main floor is all about flow, featuring a dedicated home office for a quiet workspace and a high-end chef's kitchen, large island designed for real life and effortless entertaining. The formal dining room offers a great space for additional entertaining. One thing you'll never run out of here is space; the home is packed with clever storage solutions to keep life organized and clutter-free. Upstairs, the primary suite is a total escape with a spa-inspired ensuite and a "dream" walk-in closet. Two more bedrooms sit on this level (both with their own walk-ins!), while a fourth bedroom on the lower level—also with its own walk-in—is simply a perfect, private space for guests or family. The basement is wide open and ready for a movie room, a gym, or a substantial play area. Outside, you've got three different spots to catch the sun, including a front patio that looks right out onto the green space. Two other decks in the backyard add more outdoor space to enjoy. Top it all off with a triple car garage for all your vehicles and gear, and you've got a home that truly handles everything.
